

# Edward Z. Yang

290 Massachusetts Ave  
Cambridge, MA 02139  
ezyang@mit.edu

- WORK EXPERIENCE
- ◇ **Galois**, Portland, OR  
Summer 2010, Software Engineer (Intern)  
Wrote Haskell bindings for ABC and worked on the symbolic interpretation and formal verification of programs as part of Cryptol.
  - ◇ **Ksplice**, Cambridge, MA  
Winter 2010, Software Engineer (Intern)  
Ksplice creates rebootless updates for the Linux kernel. Developed a satellite server and internal infrastructure in Amazon EC2.
  - ◇ **ITA Software**, Cambridge, MA  
Summer 2009, ResOps Performance Engineer (Intern)  
Improved infrastructure and ran performance tests for Polaris.
  - ◇ **OmniTI**, Brooklyn, NY  
Summer 2008, Software Engineer (Intern)  
Wrote security tools including a web input fuzzer, a penetration tester for XSS and CSRF, and a web crawler.
- EDUCATION
- ◇ **Massachusetts Institute of Technology**  
Graduating class 2012. Candidate for Bachelor of Science in Electrical Engineering and Computer Science. GPA 5.0/5.0.
    - Coursework: *Operating Systems Engineering*, implemented a minimal operating system; *Large-scale Symbolic Systems*, techniques for building large-scale robust systems.
    - Chairman, Student Information Processing Board, 2009–2010
    - Team Leader of the scripts.mit.edu project, MIT's student-run dynamic web-hosting service with eight servers and hosting three-thousand accounts
- PORTFOLIO
- ◇ **HTML Purifier**, 2006–now  
Lead developer of an HTML filter library. The library is 50k lines of object-oriented code. It is shipped by default in numerous open source web applications. Project website is <http://htmlpurifier.org>
  - ◇ **Wizard**, 2009–now  
A management system for web applications, focusing on making the installation and upgrade of thousands of application instances tractable. It makes advanced use of Git, a distributed source control management system.
  - ◇ **Nondeterministic Turing machine search**, 2009–2010  
Nondeterministically searches for Turing machines that satisfy certain properties. Discussed in “Adventures in Three Monads”, an article I wrote for The Monad Reader; see <http://web.mit.edu/~ezyang/Public/threemonads.pdf>
  - ◇ **Open source**  
I've written patches for various open-source projects, including Sup, pyafs, SimpleTest, Drupal, Sprox, PHP and MediaWiki.
- SKILLS
- ◇ **Programming Languages**: Proficient in C, Java, Javascript, Python, Haskell, PHP. Familiar with x86 assembly, MySQL, Lisp/Scheme/Clojure, Perl, XSLT.
